

THE VALUE OF PEP RESULTS: A MANUFACTURER'S PERSPECTIVE

WHO

Solavore, LLC, is a social enterprise,
i.e. a company that is committed to
making a social impact. Thus we serve
two masters: our commercial

customers and our developing world
customers.

What three things
do we most value
from a
Performance
Evaluation
Process?

1. EDUCATION: Inform the consumer

2. ACCURACY

The test center must:

- Understand product functionality
- Test relative performance

Figure 1 – Adjusted Cooking Power plotted over Temperature Difference (32 points)

3.2 Single Measurement of Performance

From the regression line for a $T_d = 50$ °C, we have: **$P_s = 25.8$ W**

The cooking power for Solavore Sport is 25.8 Watts under the test conditions.

3. INDEPENDENT, 3rd PARTY
VERIFICATION by a known,
reputable entity

KICKSTARTER

openIDEO

- Haiti Adolescent Girls' Network (HAGN)
- Micro-entrepreneur program

THANK YOU
